Report Overview

Agriculture Machinery is any kind of machinery used on a farm to help with farming. There are many types of such equipment, from hand tools and power tools to tractors and the countless kinds of farm implements that they tow or operate.

North America dominated the market in 2015. This is ascribed to the advent of machines with better fuel efficiency and improved features in this region that have encouraged farmers to purchase new machinery for agriculture. Another major factor driving the demand for agriculture equipment in North America is the shortage of farm labor.

The strong economic growth in developing nations such as China, India, and the Middle Eastern countries is projected to further drive the farm machinery industry. Asia Pacific is expected to witness the fastest growth over the forecast period. China alone held over 20% of the regional revenue share in 2015.
