Report Overview:

Demand for agrifiber products is growing as they possess commercially beneficial characteristics in comparison to wood fiber based products. As compared to wood fiber products, agrifiber products are relatively greater in strength, available at competitive prices, possess relatively high dimensional stability, are light in weight (up to 20 percent lighter) and do not pose any environmental issues. The most important characteristic is the contribution of LEED (Leadership in Energy and Environmental Design) credit in respective manufacturer or supplier profile. Hence, most of the manufacturers and suppliers prefer agrifiber products over wood based products. These commercially beneficial and environmental friendly characteristics of agrifiber products are expected to lead to the growth of global agrifiber products market in the coming years. In addition, these products are made from renewable resources and are recognized as user friendly and green building products. This factor may also fuel the global agrifiber products market in the coming future.
