Report Overview

AGRP polyclonal antibody (Agrp polyclonal antibody) is a specific antibody against AGRP (Agouti-related protein, also known as Agrt or Art) protein. It is a type of polyclonal antibody, that is, a mixture of antibodies produced by multiple different immune cell clones. These cloned antibodies can recognize and bind to multiple different antigenic epitopes on the AGRP protein, thereby providing comprehensive immune recognition capabilities. AGRP polyclonal antibodies are usually obtained by injecting AGRP or its related antigens into animals (such as guinea pigs) to stimulate the immune system to produce an immune response, and then separated from the animal serum.
