## Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on AGV and AMR Vehicle-mounted Controllers competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. AGV/AMR controllers are core control units used in autonomous transport vehicles (AGVs) and autonomous mobile robots (AMRs). They are responsible for vehicle positioning and navigation, task scheduling, drive management, communication interfaces, and safety control. Global sales were estimated at approximately 450,000 units in 2024, with an average unit price of approximately US\$1,200. A typical single-line annual production capacity was approximately 30... The product range comprises 000 units. Upstream companies mainly produce semiconductor controller chips, power drivers, communication modules, sensors and navigation hardware, embedded software and system integration platforms. Downstream companies are mainly warehousing and logistics equipment manufacturers, automobile manufacturers, electronic manufacturing automation manufacturers, express logistics operators and smart factory system integrators. The gross profit margin is approximately 40%. The product cost structure is roughly as follows: controller chips and power devices account for approximately 45%, sensors and communication modules account for approximately 20%, housing and heat dissipation structure and machining account for approximately 15%, software development and system integration account for approximately 10%, and testing, certification and after-sales service account for approximately 10%. Products can be classified by parameters into three types: by processing capacity (e.g., low load type, medium load type, high load type), by navigation method (e.g., laser SLAM type, visual navigation type, magnetic strip navigation type), and by communication interface (e.g., WiFi/5G type, Ethernet type, hybrid communication type).

The global AGV and AMR Vehicle-mounted Controllers market size was estimated at USD 540.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 7.50% during the forecast period.
