Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on AI Server Connectors competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, global AI server connectors production reached approximately 63 million units, with an average global market price of around US\$ 8.8/unit. AI server connectors are physical interface components used within AI computing platforms to enable high-speed transmission of data, signals, and power between modules such as CPUs, GPUs, memory, storage, and networking devices. They are critical to ensuring high bandwidth, low latency, and system interoperability in artificial intelligence servers.

Fast Market Growth: Stimulated by the surging demand of AI servers, the whole AI server connectors industry will show optimistic and fast growth in the next few years.

High Market Concentration: Currently, the AI server connectors market is dominated mainly by three players, including Amphenol, TE Connectivity and Molex. The industry faces high entry barriers with three suppliers continuing to dominate the market in the coming years. Presently, Amphenol has signed the sole agreement with Nvidia and supplies high speed connectors and copper cables for their GB 200 servers. Other connectors suppliers have less chances.

Continuous Technology Innovation: The connectors industry will keep technology innovation to meet the AI servers industry demand. Presently, the signal speed is transferring from PCIe 3.0, PCIe 4.0 to PCIe 5.0, PCIe 6.0, which require connectors manufacturers continue to increase their investment on R&D. Connectors manufacturers must build close relationship with AI GPU and servers manufacturers to know about client's requirements changes.

The global AI Server Connectors market size was estimated at USD 556.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 18.50%

during the forecast period.
