Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on AIDC Energy Storage Battery competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, global AIDC Energy Storage Battery production reached approximately 9.97GWh, with an average global market price of around 114.29 USD per KWh. With the explosive growth in demand for artificial intelligence (AI) computing power, data centers (IDCs) are rapidly upgrading to AI data centers (AIDCs). This has led to a surge in both power consumption and the need for stable power supply, making energy storage a key solution and a new battleground for enterprises. AIDC Energy Storage Batteries are core energy support components for AIDCs, specifically designed to meet the high-power, high-fluctuation, and high-reliability power demands of AI computing scenarios. By precisely controlling energy storage and release, they ensure uninterrupted power supply for core scenarios such as server operation and AI model training, while mitigating the challenges of grid fluctuations and the intermittency of renewable energy generation. Regarding upstream raw materials for AIDC Energy Storage Batteries, lead-acid batteries primarily use lead ingots, lead alloys, and casings (plastics), while lithium-ion batteries primarily use lithium iron phosphate, graphite, electrolyte (lithium battery), casing (lithium battery), BMS, module cells, and PACK. Downstream applications of AIDC Energy Storage Batteries are mainly in intelligent computing data centers for large, medium, and small enterprises. Typical customers include NVIDIA, Intel, Google, AMD, Huawei, Baidu, and Alibaba. The production capacity of AIDC energy storage batteries varies greatly due to differences in technology routes and product forms, and the industry's gross profit margin is usually in the range of 20%-40%.

The global AIDC Energy Storage Battery market size was estimated at USD 1143.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 73.50% during the forecast period.

This report offers a comprehensive and in-depth analysis of the global AIDC Energy Storage Battery market, covering all critical facets from a broad macroeconomic overview to detailed micro-level insights.
