Report Overview

Air Cooled Heat Exchanger's also known as Fin Fan heat exchangers are typically used in applications where water is not available or the desired process outlet temperature can be achieved given the maximum ambient temperatures.

The surging prices of energy have resulted in increased demand for heat exchangers. The global demand for heat exchangers is expected to increase in the near future considering the vital role they play in the major industries, such as petrochemical, petroleum refining, and power. Heat exchangers are one of the most efficient options for saving energy. They help in reducing power costs by 20–40%, as they do not require electricity. Thus, the increasing focus on saving energy costs plays an important role in driving the demand for heat exchangers. The demand for energy-efficient equipment by energy-intensive consumers, such as chemical and pharmaceutical manufacturers, food and beverage processing plants, and the oil and gas and marine industries is also driving the heat exchangers market, globally.
