## Abstracts

Air leak testers judge leaks by pressurizing the inside (or outside) of sealed work by air and measuring the pressure change. When the master with no leak and work with leak are pressurized, the pressure of the work with leak will decrease generating pressure difference between the master and work. The leak is measured from this pressure difference. Generally, this differential pressure type air leak test is used for leak check. Furthermore, air is used as the medium for tests with these testers in which running cost is low and is environment friendly. With the acceleration of global industrialization and urbanization, the importance of monitoring air quality and gas leaks is becoming increasingly prominent. As a key safety monitoring device, the market demand for air leak testers continues to grow. Technological innovation is an important factor driving the development of the air leakage tester market. With the continuous advancement of sensor technology, data processing technology, and automation technology, the performance and accuracy of air leak testers are constantly improving, the detection speed is accelerating, and the operation is more convenient. At the same time, the continuous emergence of new detection technologies, such as optical principles, electrochemical principles, semiconductor principles, etc., provides more possibilities for the application of air leakage testers. The application fields of air leak testers are constantly expanding. In addition to traditional industries such as industrial production, automobile manufacturing, and home appliance manufacturing, air leak testers are gradually being applied in high-end fields such as medical equipment, aerospace, and military equipment. These fields have higher requirements for product airtightness, sealing, and safety, thus providing more development opportunities for the air leakage tester market. Global key players of Air Leak Testers include InterTech Development Company, TASI Group (Innomatec Test), ATEQ, etc. The top three players hold a share over 26%. North America is the largest market, with a share about 35%, followed by Asia-Pacific and Europe, with share 32% and 28%, separately. In terms of product type,

Desktop Leak Tester is the largest segment, occupied for a share of 83%. In terms of application, Automobile and Motorcycle Accessories is the largest, which has a share about 29 percent.
