Report Overview
Air stripping technology can be found in many industries and applications. If you work in an industrial field that deals with things like petroleum, dirty groundwater, or harmful contaminants, chances are you have utilized Air Stripping Technology. This equipment is used to clean water in factories, drinking water facilities, waste cleanup sites, and anywhere that contaminated water is found. Air stripping removes chemicals called volatile organic compounds (VOCs), which are chemicals that can evaporate easily by changing from a liquid to a gas. Once the air and chemical vapors are mixed, the vapors are removed or expelled outside if VOC levels are low enough.
