## Abstracts

Air Traffic Advisory Service (ATS) is an important component of Air Traffic Services (ATS). It primarily provides aircraft crews with helpful traffic dynamics advice and intelligence information in uncontrolled airspace to assist flight decisions and improve flight safety and airspace utilization efficiency. Air Traffic Advisory Service (ATS) is a component of Air Traffic Services (ATS) as defined by the International Civil Aviation Organization (ICAO). Air Traffic Services is a broader concept, encompassing not only advisory services but also the more familiar Air Traffic Control Services (ATCS), Flight Information Services (FIS), and Alerts Services. Based on airspace classification, advisory services are primarily conducted in uncontrolled airspace (such as specific levels of Flight Information Regions). In this airspace, aircraft are not subject to mandatory instructions from air traffic controllers but still require essential information for safety, hence the need for advisory services. As a specialized sub-field, the development of Air Traffic Advisory Services closely follows the growth and technological changes in the global aviation industry. The global market is dominated by mature markets such as North America and Europe, but the Asia-Pacific region is becoming one of the fastest-growing areas. With the rapid development of China's civil aviation industry and the continuous optimization of airspace management, the demand for professional advisory services is also increasing.

The global Air Traffic Advisory Service market size was estimated at USD 1395.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 3.50% during the forecast period.
