Abstracts

Increasing fuel prices and dwindling air ticket fares in the face of brimming demand for air transport facilities has driven airline companies towards adoption of Used Serviceable Material (USM). To tackle expenditure challenges, airline companies across the globe are opting for air transport USMs. Compared to non-OEMs, a majority of air transport USMs will be provided by OEMs. High expenditure in transport of these materials and growing importance on proper maintenance and authorized servicing of air transport USM will drive the contribution of OEMs in the overall market revenues.
