## Abstracts

Aircraft washing trucks are specialized mobile cleaning vehicles designed for the exterior maintenance of aircraft, including commercial airliners, cargo planes, private jets, and military aircraft. These trucks are equipped with high-pressure water systems, detergent injection mechanisms, telescopic or articulated booms with rotating brushes or spray nozzles, and water recycling or filtration systems to meet environmental regulations. They are engineered to operate safely in airport environments, often featuring non-corrosive materials, explosion-proof components, and precise maneuverability to avoid damaging aircraft surfaces or interfering with ground operations. The primary function of these vehicles is to remove dirt, grime, fuel residues, insects, and other contaminants that can affect aerodynamics, fuel efficiency, and the structural integrity of the aircraft over time.
