Abstracts

In the report, the product mainly refers to airlaid paper. Airlaid paper is a textile-like material categorized as a nonwoven fabric made from fluff pulp. Compared with normal wet-laid paper and tissue, air-laid paper is very bulky, porous and soft. It has good water absorption properties and is much stronger compared with normal tissue. Key players in the airlaid products industry include Glatfelter, Duni AB and so on. Glatfelter is the largest supplier of airlaid products globally with more than 30% share. The company is actively expanding their airlaid business through acquisition of airlaid business from Georgia-Pacific as well as building new plants. As economies in Asia and Latin America continue to grow, demand for hygiene products is expected to increase significantly. Rising awareness about personal health, hygiene, and increasing purchasing power provide opportunities for airlaid products producers to expand. In regions like China and India, the shift from traditional fabric or tissue-based products to modern disposable alternatives is driving demand for airlaid products in baby care, adult incontinence, and medical applications. The airlaid products market is set to experience robust growth due to increasing demand in various downstream industries.
