Abstracts

Economic expansion in many parts of the world has resulted in higher disposable income and a growing middle class. As a result, more people can afford to fly, increasing demand for flights and necessitating the purchase of new aircraft to serve the expanding number of passengers. Rapid urbanization and economic development have occurred in emerging economies, particularly in Asia, Latin America, and Africa. These areas are seeing an increase in air travel as more people opt to fly for business, pleasure, and other reasons. To meet the expanding number of routes and passengers in these markets, the aircraft fleet must be expanded. Aircraft require more maintenance as they age, and their fuel efficiency may drop. Airlines frequently discard older aircraft in favor of newer, more fuel-efficient types. This trend of fleet modernization contributes to the overall expansion of the global aircraft fleet size.

The global Airplane Engine Seals market size was estimated at USD 442.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 12.00% during the forecast period.
