## Abstracts

Airport Asset Tracking Solution is a comprehensive management system based on Internet of Things (IoT) technology. It equips key assets such as baggage carts, cargo containers, ground handling equipment, and fire-fighting equipment with sensor tags (such as GPS, UWB, BLE, or RFID) to collect real-time data on their location, status, and movement trajectories. This data is transmitted and analyzed using the airport's wireless network and IoT platform. The system can accurately monitor the real-time distribution and utilization of various assets, automatically identify abnormal movement or idleness, and issue warnings for unauthorized access via electronic fences. Simultaneously, it combines data analysis to optimize asset scheduling efficiency, reduce search time and redundant procurement costs, and significantly improve ground handling service efficiency and flight punctuality. The global Airport Asset Tracking Solution market exhibits significant regional differences. In mature markets such as North America and Europe, driven by efficient aviation operations and stringent safety regulations, the technology has moved from pilot projects to large-scale deployment and is deeply integrated with airport IoT platforms, primarily employing a combination of high-precision indoor positioning and wide-area tracking. The Asia-Pacific region, especially China and the Middle East, is becoming the fastest-growing market due to the demand for new airports and smart upgrades, focusing on end-to-end asset management and improved ground handling efficiency. Emerging markets are in the early exploratory stages. Overall, the development of this field is heavily dependent on regional aviation industry investment, technological infrastructure, and operational standardization, presenting a global landscape of "universal demand but differentiated technological paths."

The global Airport Asset Tracking Solution market size was estimated at USD 706.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of

5.90% during the forecast period.
