Abstracts

Continued growth in air travel in developing countries such as China and India will lead to an increase in the number of new airports in various countries. Increase in government investment and modernization of old airports is driving the growth of the market. The constant development of new airports and the modernization of existing airports will improve the customer experience in the coming years. Additionally, increasing demand for longer runways, upgrades in air traffic control systems, and increased gate capacity are expected to drive market growth. Airport expansion projects around the world will lead to increased demand for low-cost ground handling and cargo facilities and services offered by airports.

The global Airport Handling Service market size was estimated at USD 42720.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 8.00% during the forecast period.

This report offers a comprehensive and in-depth analysis of the global Airport Handling Service market, covering all critical facets from a broad macroeconomic overview to detailed micro-level insights. It examines market size, competitive landscape, emerging development trends, niche segments, key drivers and challenges, as well as conducts SWOT and value chain analyses.

The insights provided enable readers to understand the competitive dynamics within the industry and formulate effective strategies to enhance profitability and market positioning. Additionally, the report presents a clear framework for evaluating the current status and future outlook of business organizations operating in this sector.

A significant focus of this report lies in the competitive landscape of the global Airport
