## Abstracts

The risk of kidney failure and diseases are rising globally. The delay in diagnosis of kidney diseases and busy lifestyles are putting people at the risk of increasing chronic diseases. The need for albumin tests for the CKD then plays an even important role and leads to high market valuation. The tests help in detecting kidney disease (mostly in individuals suffering from hypertension and diabetes) at an early stage and also detects the level of albumin present in the urine. Life science reagents are the fundamental materials for life science research and development, and are widely used as consumable tools in life science research activities. According to Frost&Sullivan's data, the global market size of biological reagents has reached US \$12.8 billion in 2015 and US \$17.5 billion in 2019, with a Compound annual growth rate of 8.1%.

The global Albumin and Creatinine Test market size was estimated at USD 735.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 7.80% during the forecast period.
