Abstracts

Alcoholic flavor carriers are specialized liquid solutions designed to deliver and enhance flavor profiles in alcoholic beverages, primarily through the use of ethanol or other food-grade alcohols as solvents for natural or artificial flavor compounds, extracts, or concentrates. These carriers serve as a base to ensure uniform dispersion, stability, and intensity of flavors in products such as spirits, ready-to-drink cocktails, flavored beers, and mixers, while also contributing to mouthfeel, aroma, and shelf-life preservation without altering the alcohol content or intended sensory characteristics of the final product.
