Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Alkyl-aryl Disulfides competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, global Alkyl-aryl Disulfides production reached approximately 22 kilotons, with an average global market price of around US\$ 2,400 per ton. Alkyl-aryl disulfides are a class of organosulfur compounds characterized by the presence of a disulfide bond ($-S-S-$) linking an alkyl group on one side and an aryl group on the other. This structural motif combines the reactivity of sulfur-sulfur linkages with the distinct properties of both alkyl and aromatic substituents, making these compounds useful intermediates in organic synthesis, polymer chemistry, and materials science. Their chemical behavior is influenced by the balance of electron-donating or withdrawing effects from the alkyl and aryl groups, enabling applications in vulcanization accelerators, corrosion inhibitors, antioxidants, and as building blocks in pharmaceuticals and specialty chemicals.

The global Alkyl-aryl Disulfides market size was estimated at USD 52.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 6.30% during the forecast period.
