The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Alkylphenol Polyoxyethylene Ether competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. Alkylphenol polyoxyethylene ether (APEO) is a type of nonionic surfactant made by polymerization of alkylphenol and ethylene oxide, with excellent emulsification, dispersing, wetting and antistatic properties. Alkylphenol polyoxyethylene ether is a general term for a large category of products, forming a family of nonionic surfactants with different surface activities due to the length of the alkyl group and the number of ethylene oxide additions.
