Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on All-in-one Inertial Navigation System competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, global All-in-one Inertial Navigation System production reached approximately 600 k units with an average global market price of around US\$550 per unit. Single-line annual production capacity averages 22 k units with a gross margin of approximately 32-34%. The upstream sector is primarily focused on core inertial sensors and chip technology, including gyroscopes and accelerometers, which are characterized by high technological barriers. The downstream consumption is predominantly centered in the autonomous driving and smart vehicle sectors, serving as the core driving force behind the development of the industrial chain. Military and aerospace represent traditional markets with high precision requirements. Additionally, applications in drones, robotics, and industrial sectors are experiencing rapid growth. An all-in-one Inertial Navigation System is a navigation solution that integrates an Inertial Measurement Unit (IMU), computational processing unit, and associated software algorithms into a single compact unit. By fusing high-precision data from multiple sensors internally, it achieves accurate measurement and autonomous navigation of the attitude, position, and velocity of a moving platform without reliance on external infrastructure. This integrated design significantly reduces the system's size and weight, while enhancing its adaptability to environmental conditions and reliability, allowing the navigation system to maintain high performance even in complex environments.

The global All-in-one Inertial Navigation System market size was estimated at USD 330.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 5.90% during the forecast period.
