Abstracts

All-purpose scissors are scissors that can be used for all purposes. They can cut a variety of things, including metal, foodstuffs, and thick cardboard. General scissors are designed for cutting paper, cloth, etc., so they must be used for specific purposes. All-purpose scissors have the advantage that they can cut a very wide range of materials, eliminating the need to use multiple pairs of scissors. Any material can be used without changing scissors, and there is a way to keep them in the kitchen for cooking. Since they are a frequently used and easy-to-use item, each household now has one of these commodities. All-purpose scissors can be used in eight different ways: as scissors, knives, skin peelers, scales removers, bone cutters, shell crackers, can openers, and bottle openers. The appeal of all-purpose Scissors is that they can be used for everything from hard objects such as metal sheets and plastics to thick objects such as carpets, in addition to paper and thread.
