Report Overview

All-weather landing systems facilitate landing operations of an aircraft when visual references are low.

The ILS segment accounted for more than 80% of the total market share and is likely to dominate the all-weather landing systems market during the forecast period. Much of the segment's high growth comes from the high investments made by airport authorities on advanced runway lighting systems. Owing to their operational reliability and lower demand for aircraft instrumentation, ILS is extensively used by other navigation systems at the airport.
