Report Overview

Alpha-amylase is a protein hydrolysis enzyme, which is used for hydrolyzing alpha bonds of polysaccharides and increasing the yield of glucose and maltose.

North America was the largest market, accounting for 27,799.7 tons in 2015. High prevalence of bread processors including Sara Lee Corporation, Private Label, and Nature's Own is expected to have a substantial impact on industry. In addition, new product launches in the frozen bread segment in the U.S. and Canada is likely to increase the usage of the enzymes over the next eight years.

Europe alpha-amylase market revenue was USD 82.7 million in 2015. Sluggish growth of the food & beverage sector in light of increasing manufacturing expenditure in mature markets of Germany and UK is expected to have an adverse impact.

Asia Pacific is projected to witness the fastest volume gains at a CAGR of 5.9% in light of increasing manufacturing practices in bakery products amidst the regulatory support for foreign investments along with increasing consumption of bread products at the domestic level. Also, the increasing number of new product launches including frozen Malabar Parathas in India is expected to open new applications further over the next eight years.
