This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Alpine Touring Skis competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. Global sales of Alpine touring skis are expected to reach approximately 1.85 million pairs in 2024, with an average price of approximately US\$780. A type of professional ski equipment, ATS combines lightweight design with dual performance for uphill climbing and downhill gliding. Made with a composite wood core, carbon fiber reinforcements, and a polymer ski base, ATS is typically equipped with specialized bindings to accommodate both freestyle and competitive skiing. This product is widely used in mountain tourism, outdoor adventures, and competitive events, driving its rapid market expansion. The alpine ski and snowboard market is growing with the increasing popularity of skiing and the development of competitions worldwide. The Winter Olympics, International Ski Federation (FIS) events, and national ski associations are driving demand for professional racing snowboards. Furthermore, lightweight ski equipment, the use of high-tech materials (such as carbon fiber and titanium alloy laminates), and advances in edge and flex control technologies are making alpine ski boards more precise and efficient, attracting professional athletes and advanced ski enthusiasts. The market is also influenced by the trend towards high-end customized ski equipment, with brands offering personalized services to meet the diverse needs of professional athletes.
