## Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Alprazolam competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. Alprazolam is a short-acting benzodiazepine sedative primarily used to treat anxiety, panic disorder, and insomnia. It rapidly relieves tension, fear, and somatization symptoms by enhancing the activity of the inhibitory neurotransmitter gamma-aminobutyric acid in the central nervous system. Its onset of action is approximately 15-30 minutes, but long-term use may lead to dependence and tolerance. In 2024, the global production of alprazolam will reach 4 billion tablets, with an average selling price of US\$250 per thousand tablets. Alprazolam, a representative benzodiazepine sedative, has seen steady global market growth in recent years. Market Drivers: Rising Incidence of Anxiety Disorders and Insomnia: Global mental health issues are intensifying, particularly in Europe and the United States. Demand for alprazolam as a first-line medication for the short-term treatment of anxiety and panic disorders continues to grow. Generic Drug Dominance: With patents on brand-name drugs long past expiration, generics hold over 90% of the market share, leading to fierce price competition and a significant increase in exports from generic drug-producing countries such as India and China. Improved Access to Healthcare in Emerging Markets: The widespread adoption of psychiatric care in regions like Latin America and Southeast Asia is driving demand for the drug. Major Challenges: Abuse and Tightening Regulation: Alprazolam has been designated a controlled substance in many countries due to its addictive properties, and prescriptions are strictly limited. Impact of Alternative Therapies: The promotion of SSRIs (such as sertraline) and non-drug therapies (cognitive behavioral therapy) may squeeze the long-term market. Regional Landscape: North America is the largest consumer market, but abuse concerns have led to increased regulatory controls. In the European market,

Germany and the UK are the primary demand countries, emphasizing compliant prescriptions under restricted use policies. The Asia-Pacific market is experiencing the fastest growth (CAGR of over 8%), with domestic pharmaceutical companies in China and India accelerating their generic drug development efforts. In the future, the alprazolam market will exhibit a trend of increasing volume but slowing growth. Companies will need to balance regulatory compliance with strategies for expansion into emerging markets.

The global Alprazolam market size was estimated at USD 984.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 4.80% during the forecast period.
