Report Overview:

Alumina Ceramic Heaters are a type of Metal Ceramics Heater. Metal Ceramics Heater elements are sintered at high temperature and ceramic to fix them together to form a ceramic heating element. Generally, metal tungsten or molybdenum-manganese paste is printed on the ceramic casting body, laminated by hot pressing, and then protected by a hydrogen atmosphere at 1600 ° C. The ceramic and metal are sintered together to form a ceramic heating body. High temperature, long life, high energy efficiency, uniform temperature, good thermal conductivity, fast thermal compensation, etc., and does not contain lead, cadmium, mercury, hexavalent chromium, polybrominated biphenyls, polybrominated diphenyl ether and other harmful substances, in line with EU RoHS, etc. Environmental requirements. Metal Ceramics Heater is a new type of high-efficiency environmental protection and energy-saving ceramic heating element. Compared with PTC ceramic heating element, it can save 20-30% of electricity under the same heating effect, and there is no huge problem of power attenuation of PTC for a long time.

There are two main types of ceramics used for Metal Ceramics Heater: alumina ceramics and silicon nitride ceramics. These two ceramic materials are the most widely used in the field of electric heating elements. Silicon nitride ceramics have greater hardness and higher production costs than alumina ceramics. Therefore, the ceramic heating elements currently on the market are mainly alumina. Alumina Ceramic Heaters are produced by implementing unique metallization and ceramic lamination processes. Due to the advanced manufacturing techniques utilized in the electric element, Alumina Heaters can provide higher reliability than ever before. Currently, applications include use as innovative types of heaters in the automotive, medical, industry and electronics

industries.

The Global Alumina Ceramic Heaters Market Size was estimated at USD 119.64 million in 2023 and is projected to reach USD 168.75 million by 2029, exhibiting a CAGR of 5.90% during the forecast period.
