## Abstracts

Alumina, also known as aluminum oxide ( $\text{Al}_2\text{O}_3$ ), is a ceramic material widely used in various industrial applications due to its excellent mechanical, thermal, and electrical properties. In the context of semiconductor manufacturing, alumina is used to create electrostatic chucks, similar to Aluminum Nitride (AlN) electrostatic chucks, to hold and secure wafers during processing steps. Electrostatic Chucks: Electrostatic chucks are devices employed in semiconductor manufacturing equipment to securely hold wafers in place during various processing steps. These chucks generate electrostatic forces that hold the wafer without the need for traditional mechanical clamps or vacuum suction. Alumina Electrostatic Chucks: Alumina electrostatic chucks are manufactured by processing alumina materials into wafer-like forms with specific electrical and surface properties. These wafer-based alumina electrostatic chucks are integrated into semiconductor equipment to hold wafers during processing. Following a strong growth of 26.2 percent in the year 2021, WSTS revised it down to a single digit growth for the worldwide semiconductor market in 2022 with a total size of US\$580 billion, up 4.4 percent. WSTS lowered growth estimation as inflation rises and end markets seeing weaker demand, especially those exposed to consumer spending. While some major categories are still double-digit year-over-year growth in 2022, led by Analog with 20.8 percent, Sensors with 16.3 percent, and Logic with 14.5 percent growth. Memory declined with 12.6 percent year over year. In 2022, all geographical regions showed double-digit growth except Asia Pacific. The largest region, Asia Pacific, declined 2.0 percent. Sales in the Americas were US\$142.1 billion, up 17.0% year-on-year, sales in Europe were US\$53.8 billion, up 12.6% year-on-year, and sales in Japan were US\$48.1 billion, up 10.0% year-on-year. However, sales in the largest Asia-Pacific region were US\$336.2 billion, down 2.0% year-on-year.

The global Alumina Materials Wafer Electrostatic Chucks market size was estimated at

USD 1148.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 6.50% during the forecast period.
