## Abstracts

Aluminum foil containers for wet pet food are containers made of aluminum foil and are specially used for wet pet food packaging, storage, grilling and heating. The main material is aluminum, which has been specially processed to allow it to directly contact food without causing chemical reactions. There is usually a dense oxide layer on the surface of aluminum foil. The chemical properties of this oxide layer are relatively stable and can prevent aluminum ions from precipitating in a non-strong acid environment, thereby ensuring the safety and hygiene of food.
