Report Overview

Aluminum foil fiberglass cloth is a composite material made by laminating a layer of aluminum foil onto a base of woven fiberglass cloth. This combination results in a material with excellent thermal insulation, fire resistance, and reflective properties, making it highly effective in managing heat and providing protection in high-temperature environments. Aluminum foil reflects radiant heat, while the fiberglass cloth provides mechanical strength and fireproofing. It is widely used in industries such as construction, automotive, aerospace, and manufacturing, where it serves as insulation for ducts, pipes, and equipment, as well as protective covering in environments exposed to high heat, moisture, and chemicals. Additionally, its lightweight and flexible nature allows for easy installation in various applications.
