### Report Overview

Surfactants are chemical products consumed in large quantities every day on a worldwide scale. The development of less irritant, less toxic, consumer-friendly surfactants is, therefore, of general interest. Amino-acid-based surfactants constitute a novel class of surfactants produced from renewable raw materials and can be seen as an alternative to conventional surfactants.

In the report, we cover amino acid surfactants data by actual data instead of concentration conversion. Since amino acid surfactants have too many product forms and types, it may not be appropriate to convert by 30% solution or 100% active ingredient. Most amino acid surfactants solution has an active ingredient of 30-50%, and solid amino acid surfactants typically have an active ingredient of over 95%. Global Amino Acid-based Surfactants main manufacturers include Ajinomoto, Sino Lion and Changsha Puji, totally accounting for 30% of the market. China is the largest market, with a share over 58%. As for the types of products, it can be divided into glutamic acid based surfactant, glycine based surfactant, sarcosine based surfactant, alanine based surfactant and others. The most common type is glycine based surfactant, with a share over 35%. In terms of application, it is widely used in facial cleaner, shower gel, shampoo and others. The most common application is facial cleaner, which accounts for 70% of all.
