Abstracts

Anaerobic thread sealants are single-component, liquid adhesives designed specifically to seal threaded connections by remaining liquid in the presence of oxygen but curing into a solid, thermoset plastic when confined between close-fitting metal surfaces in the absence of air. These products prevent leakage, resist vibration loosening, and provide corrosion protection across a wide range of pressures and temperatures, distinguishing them from traditional sealing methods such as PTFE tape or paste-based compounds by offering superior seal integrity, chemical resistance, and controlled application strength.

The global Anaerobic Thread Sealants market size was estimated at USD 305.5 million in 2024 and is projected to grow at a compound annual growth rate (CAGR) of 4.85% during the forecast period.
