Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Anethol Trithione Tablets competitive dynamics, regional economic interdependencies, and supply chain reconfigurations.Anethol Trithione tablets are pharmaceutical formulations primarily used for liver protection and treatment of various liver disorders, including chronic hepatitis and cholestasis. These tablets contain anethol trithione, a sulfur-containing compound that promotes bile secretion and exhibits antioxidant properties, helping to improve liver function and detoxification. Widely prescribed in many countries, anethol trithione tablets are valued for their effectiveness in supporting liver health and alleviating symptoms associated with impaired bile flow. They are typically administered orally, with dosage and treatment duration tailored to the patient's specific condition. In 2024, global anethol trithione tablets sales volume reached approximately 2114.3 million pcs , with an average global market price of around US$ 0.14 per pc.

The global Anethol Trithione Tablets market size was estimated at USD 296.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 3.30% during the forecast period.

This report offers a comprehensive and in-depth analysis of the global Anethol Trithione Tablets market, covering all critical facets from a broad macroeconomic overview to detailed micro-level insights. It examines market size, competitive landscape, emerging development trends, niche segments, key drivers and challenges, as well as conducts SWOT and value chain analyses.

The insights provided enable readers to understand the competitive dynamics within the
