Abstracts

Animated videos are videos created with original designs, drawings, illustrations or computer-generated effects that have been made to move in an eye-catching way using any number of artistic styles. Although they may integrate live action video, they don’t require any live action recording to convey an idea or story.The rise of digital platforms, social media, and online marketing increased the demand for engaging and shareable content. Animated videos were used by businesses to convey messages, explain concepts, and capture the attention of online audiences. Businesses across industries, from startups to established brands, were using animated videos as part of their marketing and branding strategies. Animated videos can effectively communicate a brand"s story, products, and services in a visually appealing and memorable way. Animated explainer videos gained popularity as a means to simplify complex concepts or processes. They were widely used by businesses to introduce products, services, and features to potential customers. Educational institutions, e-learning platforms, and online courses utilized animated videos to make learning more engaging and accessible. These videos were effective in explaining academic concepts and engaging students. Animated videos continued to be a major component of the entertainment industry, including television shows, movies, and online streaming platforms. The demand for high-quality animation content was driven by both children and adult audiences. The healthcare sector began using animated videos to explain medical procedures, treatment options, and health information to patients in a visually clear and understandable manner. Advancements in animation software and technology made it easier for creators to produce high-quality animated videos. This led to an increase in the number of individuals and small businesses creating their own animated content. With the rise of platforms like TikTok and Instagram Reels, there was a trend toward shorter animated videos designed to capture viewers" attention quickly. The COVID-19 pandemic further accelerated the use of animated videos, as businesses and creators
