## Abstracts

Answer engine optimization (AEO) software, also known as generative engine optimization (GEO), is designed to improve a brand's visibility in AI-powered search and discovery engines, including large language models (LLM) and AI chatbots. Unlike search engine optimization (SEO) tools, which focus on increasing website rankings in traditional search engine results pages (SERP) like Google, Bing, and Yahoo, AEO tools optimize content for AI-generated answers, conversational interfaces, and AI-curated search results. These tools also provide businesses with a clearer understanding of how AI platforms interpret, reference, and display their content, which helps them refine their digital presence accordingly. AEO software is often used by product and marketing teams, PR professionals, and AI specialists to manage and improve how their brand is represented in AI-generated search experiences.

The global Answer Engine Optimization (AEO) Tools market size was estimated at USD 527.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 5.20% during the forecast period.
