Abstracts

The market for anti-corrosive metal primers encompasses a range of protective coatings specifically formulated to inhibit corrosion on metal substrates by forming a barrier against moisture, oxygen, and environmental contaminants, often through the use of corrosion-inhibiting pigments such as zinc phosphate, chromate, or epoxy-based resins. These primers serve as a foundational layer in multi-coat systems across industries including automotive, marine, construction, industrial manufacturing, and infrastructure, where they enhance adhesion for subsequent topcoats while providing long-term protection against rust, chemical exposure, and atmospheric degradation. Product variations include water-based, solvent-based, and high-solid formulations tailored to application methods, environmental regulations, and specific performance requirements such as durability under extreme conditions or compliance with VOC (volatile organic compound) standards.

The global Anti Corrosive Metal Primer market size was estimated at USD 1250.5 million in 2024 and is projected to grow at a compound annual growth rate (CAGR) of 4.75% during the forecast period.
