Report Overview

There are several occupations in which prolonged hours of standing is required such as the manufacturing industry where workers have to stand for long hours carrying out operations at the assembly line. Standing on a hard concrete floor for long periods of time can cause fatigue and severe discomfort in the feet, legs and lower back. If such problems are ignored, one may suffer from musculoskeletal disorders and have other health issues like varicose veins and joint pain problems. Hence, in order to alleviate the risk from the jobs requiring constant standing on hard concrete floors, anti-fatigue footwear is used. They not only protect the feet from the constant wear and tear of standing and walking on hard surfaces for long hours, but also cushion our feet with a pocket of air between the feet and the solid surface, distributing the load evenly in the entire foot, giving a much needed relief from fatigue and other issues.
