Report Overview

An anti-fog cloth is a specially designed cloth that is used to prevent fogging on various surfaces, such as eyeglasses, camera lenses, mirrors, and goggles. It is typically made of a microfiber material that has been treated with a hydrophilic coating. This coating helps to absorb moisture and prevent condensation from forming on the surface, thereby keeping it clear and fog-free. Anti-fog cloths are often used in situations where fogging can be a problem, such as during cold weather, high humidity, or when wearing protective gear. They are reusable and can be easily stored and carried for convenience.
