Abstracts

Anti-oxidation and anti-rust turbine oil is a kind of lubricating oil specially used for lubricating and protecting steam turbines. During the operation of the steam turbine, the steam turbine oil plays multiple functions such as lubrication, cooling, sealing and rust prevention, so as to ensure the stable operation and life of the steam turbine. Anti-oxidation and anti-rust turbine oil can resist oxidation, corrosion and rust through its special formula and performance, prolong the service life of the steam turbine and improve its working efficiency. As the operating temperature of steam turbines continues to increase, future oil products may pay more attention to high-temperature oxidation resistance to adapt to more severe working conditions.

The global Anti-Oxidation and Anti-Rust Turbine Oil market size was estimated at USD 1255.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 3.50% during the forecast period.
