Report Overview

Anti-seize paste is a lubricating compound designed to prevent metal parts from seizing, galling, or corroding due to friction, heat, or chemical exposure. It is commonly used in high-temperature and high-pressure environments, such as automotive, aerospace, marine, and industrial machinery applications, where metal components are prone to sticking or becoming difficult to disassemble. The paste typically contains a blend of metallic or non-metallic solids (e.g., copper, aluminum, graphite, or nickel) suspended in a grease or oil base, providing lubrication and corrosion resistance.
