## Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Anti-Static Polycarbonate Sheet competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, global Anti-Static Polycarbonate Sheet production reached approximately 81,538,462 square meters, with an average global market price of around US\$32.50 per square meter. Anti-Static Polycarbonate Sheets are engineered thermoplastic panels that combine the inherent impact resistance and transparency of polycarbonate with static-dissipative properties. These sheets are treated or compounded with anti-static agents to maintain surface resistivity between  $10^6$  to  $10^9$  ohms, preventing electrostatic charge buildup and discharge that could damage sensitive electronics or create hazardous conditions. Featuring excellent optical clarity, high impact strength, and superior dimensional stability, anti-static PC sheets are widely used in cleanrooms, electronic manufacturing, medical device packaging, and industrial applications where both static control and durable transparent barriers are required. They offer superior performance in harsh environments while maintaining ESD safety standards. The anti-static polycarbonate sheet market is growing steadily due to the expanding electronics manufacturing sector and increasing demand for ESD protection in sensitive environments. Technological advancements in anti-static coating technologies are enhancing the performance and durability of these sheets. The rise of cleanroom applications in pharmaceuticals and biotechnology is creating new market opportunities. Stringent ESD safety regulations across industries are driving the adoption of standardized anti-static materials. The shift toward miniaturized electronics requiring more stringent static control measures is boosting market demand.

The global Anti-Static Polycarbonate Sheet market size was estimated at USD 2650.0

million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 6.30% during the forecast period.
