Report Overview

An antibody labeling kit is a laboratory reagent set designed for immunochemistry experiments requiring visualization or detection of target proteins using an enzyme-linked immunosorbent assay (ELISA). These kits contain labeled secondary antibodies conjugated to horseradish peroxidase (HRP), alkaline phosphatase (AP), or other reporter enzymes along with buffers and standards required for ELISA protocol. These kits simplify the process of conducting ELISAs by offering ready-to-use reagents and optimized conditions for each application. These kits allow for sensitive and accurate detection of specific protein targets in different matrices such as cell extracts, serum/plasma, and tissues.
