Report Overview

The global research and development of siRNA drugs is still in the development stage of the industry. There are about 300 projects after the global laboratory stage, and the overall development trend is good. Its therapeutic areas are mainly concentrated in tumor, neurology and ophthalmology. Since siRNA has a larger molecular weight and stronger charge than ASO, it is more difficult for siRNA to enter cells by itself, so siRNA drugs have higher requirements for carriers, which is why siRNA drugs are approved later than ASO drugs big reason.
