The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on API Forged Steel Gate Valves competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, global sales of API forged steel gate valves reached 8.65 million units, with an average selling price of US\$235. API forged steel gate valves are high-strength, high-sealing industrial valves manufactured in accordance with API 602 standards. They are primarily used in oil, gas, chemical, and high-temperature, high-pressure pipeline systems to achieve full on/off control of fluids. These valves feature a one-piece forged body structure, offering erosion resistance, high pressure resistance, fatigue resistance, and long service life. They are typically used in operating conditions PN420 and 600°C. Key upstream raw materials include A105, F11, F22, and F316 stainless steel and alloy steel forgings, sealing packing, valve stem threads, and handwheel assemblies. Major suppliers include Nippon Steel, Tsingshan Holdings, Valbruna, Outokumpu, and Baosteel Special Steel. Major global manufacturers have a total annual production capacity of approximately 9 million units, with an average industry gross profit margin of approximately 28-36%. Downstream consumption is accounted for by the oil and gas industry, approximately 50%, the chemical and power industries, approximately 35%, and the shipbuilding and other industries, 15%. Among upstream material consumption, forged steel accounts for approximately 75% of the total machine weight, while seals, packing, and threaded connections account for approximately 25%. Future developments lie in the development of high-alloy materials, intelligent monitoring and valve control systems, and the application of supercritical pressure conditions.

The global API Forged Steel Gate Valves market size was estimated at USD 2033.0

million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 4.90% during the forecast period.
