Report Overview

Patterned glass, also known as textured glass or rolled glass, is a type of decorative glass that features various patterns or textures on its surface. It is commonly used in architectural applications, such as windows, doors, partitions, and shower enclosures, as well as in interior design and furniture. Patterned glass is manufactured by passing a sheet of molten glass between two rollers, one of which is engraved with the desired pattern. As the glass cools and solidifies, the pattern is imprinted onto its surface. The rollers can have different patterns, such as frosted, etched, or embossed designs, creating a wide range of decorative options.
