Abstracts

Architectural window film is a material used for building glass windows, offering a variety of functions and applications. Typically made from special polymer, this film can be applied to the surface of window glass. Firstly, architectural window film provides privacy protection by blocking external views and reducing the transparency of the building's interior, enhancing privacy. Secondly, it effectively blocks harmful ultraviolet radiation, reducing fading of indoor furniture and flooring, while also lowering indoor temperatures and improving energy efficiency. Moreover, some architectural window films offer features like blast resistance, storm protection, and bulletproof capabilities, enhancing the security of the building. Global key players of Architecture Window Film include Eastman, Saint-Gobain, 3M, Madico and Johnson, etc. The top five players hold a share over 25%.
