### Report Overview

An armored personnel carrier (APC), also known as an armored combat vehicle, armored car, or infantry mobility vehicle, is an armored vehicle designed to carry troops and equipment into the battlefield. APCs weigh less than the infantry fighting vehicles and main battle tanks and hence are more mobile. Unlike the infantry fighting vehicles (IFV), APCs do not participate in the direct-fire battle and are primarily designed for transport. However, they are lightly armed for self-defense and are armored for protection against shrapnel, small arms, and artillery fire. Furthermore, certain types of APCs are used by non-military organizations as well.
