Report Overview

Armoured and tactical wheeled vehicles patrol and protect in some of the most dangerous conflict zones in the world. Combining operational mobility with offensive and defensive capability, these warfighting machines are deployed around the world to protect enemy lines.

These combat vehicles are enemy targets, with fuel tanks and hydraulic lines that can explode into flames if penetrated when caught in cross fire. Engine compartments, tires and other external areas are all susceptible to explosive fires from roadside bombs, improvised explosive devices and explosively formed penetrators.

More recent conflicts have highlighted that additional fire protection to handheld fire extinguishers already carried onboard are needed. Modern vehicle designs mitigate fire hazards, but to protect military ground crews from injury due to fire, automatic fire suppression is needed.
