Abstracts

An armoured infantry fighting vehicle (AIFV) is a highly mobile, heavily armored combat vehicle designed specifically for infantry combat, integrating robust firepower, strong armor protection, and superior cross-country capability. Its tracked drive system provides stable support and enhanced maneuverability over rough terrain compared to wheeled vehicles, ensuring high-speed travel and control in slippery or uneven conditions. The design prioritizes the protection of crew members from enemy fire and threats such as mines, while also offering sufficient firepower support for dismounted infantry, enabling them to engage in combat with effective vehicle cover. The tracked structure also distributes impact pressure, reducing the risk of injury to personnel inside, ensuring rapid deployment and flexible combat capabilities on the battlefield.

The global Armoured Infantry Fighting Vehicle Aifv market size was estimated at USD 7417.0 million in 2024 and is projected to grow at a compound annual growth rate (CAGR) of 4.50% during the forecast period.
