Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Aromatic Disulfides competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, global Aromatic Disulfides production reached approximately 66 kilotons, with an average global market price of around US\$ 8,200 per ton. Aromatic disulfides are a class of organic compounds containing two aromatic rings linked by a disulfide bond ($-S-S-$). Their general structure is $Ar-S-S-Ar'$, where Ar and Ar' represent aromatic groups such as phenyl, tolyl, or substituted benzene rings. The disulfide linkage imparts unique redox properties, making these compounds valuable as intermediates in organic synthesis, stabilizers in polymers, antioxidants, and in certain specialty chemicals. Aromatic disulfides are also studied for their reversible cleavage and reformation under redox conditions, which has applications in self-healing materials, pharmaceuticals, and advanced functional materials.

The global Aromatic Disulfides market size was estimated at USD 542.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 4.90% during the forecast period.
